

Vulture updates No. 25: October 2026

Supplement: Recent publications

Please find compiled below a list of vulture-related articles published between April and October 2026 and organised by region. These were found using Google Scholar searches for ‘vulture’ and ‘condor’ and will not be fully comprehensive, but hopefully gives an idea of the range of research coming out. We’ve made this a supplement of the newsletter in a separate document, to save space.

As always, if you have any contributions for the next newsletter, or you see anything missing here, please email vsg-cat-taras@outlook.com
